

System vs Parts

Sports lighting may be purchased as a complete system, or as a single fixture that must then be matched up with parts and pieces from a variety of sources. Here’s an analysis:

  <div><div></div>Shaded areas indicate engineered components</div>	
Engineered as a complete system <ul style="list-style-type: none">• Parts selected by trained engineers for compatibility• Critical components assembled in controlled environment• Tested prior to shipping• Single source accountability with light level guarantee and warranty on entire system	Parts and pieces of unknown strength and quality put together by the installer <ul style="list-style-type: none">• Inconsistent warranties from several sources• Exposed wiring creates maintenance problems
Factory aimed <ul style="list-style-type: none">• Reduced installation time and expense• Known results	Individual fixture-by-fixture aiming from the top of the pole <ul style="list-style-type: none">• Adds installation time and cost• Unknown results
Electrical components mounted at pole base <ul style="list-style-type: none">• Easier maintenance• Weight reduction at poletop assures better fixture alignment	Electrical components on fixture <ul style="list-style-type: none">• Troubleshooting must be done from the top of the pole• Increases chance of misalignment
Built-in lightning and surge protection <ul style="list-style-type: none">• Assures it’s installed and operating	Unknown protection
